

reflection layer on a surface on the opposite side to said liquid crystal display device.

5. The illumination device for display device as claimed in Claim 1, wherein said light sources are elongated lamps provided in approximately parallel to each other along the side end of said light guide plate.

REMARKS

The foregoing Preliminary Amendment to claims 3-5 were made solely to avoid filing the claim in the multiple dependant form so as to avoid the additional filing fee.

The claims were not amended in order to address issues of patentability and Applicant respectfully reserves all rights she may have under the Doctrine of Equivalents. Applicant furthermore reserves her right to reintroduce subject matter deleted herein at a later time during the prosecution of this application or continuing applications.

Respectfully submitted,

By
